

GIS TECHNICIAN APPLICANT QUESTIONS

First and Last Name:

Thank you for your interest in joining our team! To help us better understand your qualifications and experience, please complete the following questionnaire and submit this with your online application. Your responses will provide valuable insights into your skills and expertise in key areas related to this role. Please select the option that best reflects your experience for each question, and feel free to provide additional details if necessary. Your candid and accurate answers will assist us in assessing how your strengths align with the responsibilities of the position.

1. How would you rate your experience with GIS data acquisition, management, and analysis?
 - Have independently handled complex GIS datasets, ensuring data integrity and accuracy.
 - Have worked with GIS data under supervision but require guidance for advanced tasks.
 - Limited experience managing GIS data but eager to learn.

2. How proficient are you in using GIS software such as ArcGIS Pro, ArcGIS Online, or QGIS?
 - Confidently use GIS software for mapping, spatial analysis, and data visualization.
 - Comfortable with basic GIS functions but need training in advanced workflows.
 - Minimal experience with GIS software but willing to develop skills.

3. What is your experience integrating GIS data with other engineering and municipal applications?
- Have successfully integrated GIS data with CAD, BIM, or municipal systems for project planning.
 - Have worked with GIS data in coordination with other applications but require guidance.
 - Limited experience with GIS integration but eager to learn.
4. How familiar are you with GIS-based cartography and data visualization?
- Have created professional maps, dashboards, and visualizations for stakeholders.
 - Have basic knowledge of cartography but need more experience designing complex maps.
 - Limited exposure to cartography but eager to develop this skill.
5. How confident are you in managing GIS databases and ensuring data quality?
- Have managed GIS databases, performed data cleaning, and ensured data accuracy.
 - Have worked with GIS databases but require additional training for full management.
 - Minimal experience managing databases but eager to develop skills.
